

What you'll learn — and why it matters

● Tier 1 — Foundations

~7 h · Modules 1–6

● Tier 2 — Working Effectively

~6 h · Modules 7–11

● Tier 3 — Production & Advanced

~6 h · Modules 12–16

16 modules · ~19 hours · dbt Core + Snowflake.

By the end you can **read, write, test, and maintain** dbt models confidently in our Snowflake stack.

Course Map

● Tier 1 – Foundations

~7 h

- 01 Why dbt? Context and mental model
- 02 Local setup: `profiles.yml`, project init, repo structure
- 03 The dbt execution sequence
- 04 Sources and the medallion architecture
- 05 Testing data quality
- 06 Documentation

Full lesson plans + exercises

● Tier 2 – Working Effectively

~6 h

- 07 Materializations in depth
- 08 Seeds and variables
- 09 Jinja and macros
- 10 Slowly changing dimensions and snapshots
- 11 Selectors, tags, and running subsets

Slides + hands-on practice

● Tier 3 – Production & Advanced

~6 h

- 12 CI/CD and slim CI
- 13 Advanced testing patterns
- 14 Incremental patterns for large tables
- 15 Custom macros and `scd2_merge` deep dive
- 16 Governance, contracts, and access

Planned — builds on Tier 2

Start at Tier 1 and work in order. Each module builds on the previous one.

Not everyone needs Tier 3 — see the agenda for role-based paths.
